

Free EHR solution: charting, scheduling and e-prescribing, a comprehensive EHR and practice management tool

Much of Practice Fusion's continued growth within the physician practice community can be attributed to the 'Live in Five' process. Competing vendors in the market typically require practices to 'rip and replace' their existing systems. - Nurse LinkUP

Practice Fusion's EHR (Electronic Health Record) was developed from the real workflows of office-based physicians. Our free, web-based EHR system is fully-featured enabling you to effectively manage your practice. Use our system to schedule an appointment, complete a medical chart during a visit, send a prescription with our e-prescribing feature and bill for your practice. Our EHR is so easy to use, you can sign up and start charting immediately.

Intuitive features of the Practice Fusion EHR include:

- Medical charting, the core of your daily workflow and our system's central feature. In just a few clicks, you can easily pull a patient's chart, create and sign notes, look up an entire patient history and prescribe medications. Use our [secure messaging](#) , [document management](#) ,

[lab integration](#)

and

[e-prescribing](#)

features to make your practice more efficient. Learn more about

[charting](#)

- Appointment scheduling that enables you to manage patient appointments, staff

schedules and office equipment utilization from a single, flexible online calendar within the EHR. Check your schedule from the road and offsite locations with any flash-enabled device. Learn more about [scheduling](#) .

- Medical billing that meets your billing workflow and needs. With Practice Fusion's EHR, you get the flexibility to bill the way you want, including:

- Electronically connecting with your current billing service
- Enrolling in our low-cost, U.S.-based billing service
- Signing up for integrated, low-cost billing software
